

BETTER

FASTER

STRONGER

enROUTE

THE LEADING PROVIDER OF CNC SOFTWARE

What's Better?

- New Simulator with realistic material rendering ⊕
- Mesh Slicing with easy alignment of slices ⊕
- Slotted Component Maker, both creative and useful ⊕
- On-Demand Movies for every function, just point and right click ⊕
- A whole new family of Symmetric Textures that will blow you away! ⊕
- Unwrap 3D Models for Rotary design and cutting ⊕
- Improved support for Single-Stroke Fonts ⊕
- Licensing without Hardware keys – no more dongles! ⊕

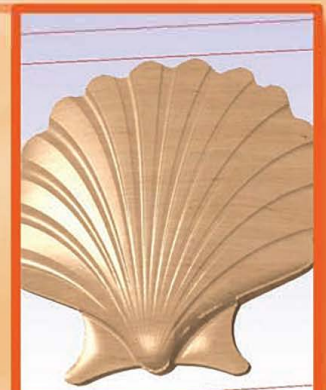

What's Faster?

- Nearly instant redraw of Contours, Toolpaths and Meshes.
Awesome for EnRoute Pro! ⊕
- New Texture Templates for both Rapid Texture and Parametric Textures ⊕
- Text Entry and Editing is fast and smooth, including copying and pasting text from outside EnRoute ⊕
- Rapid Texture improvements make it easier to create, including easy symmetric textures ⊕
- Plate Panels make it fast and easy to cut big jobs ⊕
- Switch between languages on the fly without having to change locales ⊕
- Relief slicing now creates toolpath masks automatically saving you several steps ⊕

What's Stronger?

- EnRoute Basic now includes 3D Simulation and Dynamic Nesting ⊕
- EnRoute Plus now includes Rapid Texture and the powerful Auto-Toolpath Lite for quickly processing parts ⊕
- EnRoute Pro now include full Auto-Toolpath capabilities for use with other design applications, and fabrication production tools for use with Plasma, Laser, and Waterjet machines ⊕
